

Adjustable Console Mount with Horizontal Face Plate

General installation pictures.

Installation Instruction

Please read all of the instructions and look at the pictures before attaching the ProClip.

ProClip USA may not be held liable for any damage to a vehicle before, during or after the installation or removal of this dashboard mount.

ProClip USA may not be held liable for any personal injury resulting from accident or improper use or installation.

The ProClip mount in the installation pictures may look slightly different from the one you have received. However, the same instructions apply.

Overview Picture

Note: The Adjustable Console Mount fits a variety of vehicle consoles. The pictures below are General Pictures - not necessarily of your console. However, the same instruction procedure applies.

1. Peel off the cover of adhesive tape on the ProClip. Hook the curved edge on the lower part of the ProClip under the console edge.

2. Hook the angled edge on the upper part of the ProClip over the console edge.

3. Press firmly down on top of the ProClip so the mount adjusts to the height of the console and tighten the nut with the enclosed tool.

4. Press the black cover over the nut. Press until you see or hear/feel it snaps over the white ring and into place.

5. Press a screwdriver (Philips) firmly through the predrilled holes in the face plate to open them up. Place the face plate on top of the ProClip so the holes match.

6. Screw the two parts together with the enclosed screws.

The ProClip is now in place as shown in the overview picture above.
