

Move Clip

Female and Male Plate in use with Holder with Tilt Swivel

Move your device from vehicle to vehicle or switch between several devices in one vehicle using only one mounting bracket.

Installation Instruction

Overview Picture

Please read all of the instructions and look at the pictures before attaching the Move Clip.

ProClip USA may not be held liable for any damage to a vehicle before, during or after the installation or removal of this Move Clip.

ProClip USA may not be held liable for any personal injury resulting from accident or improper use or installation.

The ProClip Move Clip in the installation pictures may look slightly different from the one you have received. However, the same instructions apply.

Place the Female Plate onto the ProClip Dashboard Mount so the holes match and screw in the screw in the lower hole.

Screw in the screw in the upper hole.

Unscrew the center screw in the Holder and remove it from the Tilt Swivel base plate.

Screw the Holder back onto the plate together so the holes match.

Place the base plate and the male plate together with the enclosed screws.

Screw the parts together with Tilt Swivel base plate.

Slide the Holder down into the slot in the Female Plate.

The Holder in place.

The Holder in place.

Note: This instruction applies for as many Female and Male Plates that you want to use/attach.
